# RISK ASSESSMENT FOR PERSONAL DATA PROCESSING ACTIVITIES IN ACADEMIC WORKS

## **General information**

Name of the project:			
Purpose of processing:			
Legitimation:			
Source of the data:			
Themselves (data subjects)	Media/database		Internet
Information from the people	whose data will be prod	cessed (data subjects)	<u>:</u>
Age of the participants:			
Under 14	Between 14 and 18	Between 18 and 65	Older than 65
Vulnerable Groups:	No	Yes	
Number of people whose data	will be collected:		
Less than 100	Between 101 and 1.000	Between 1.001 and 10.000	More than 10.000
Information on data collectin	g and processing proc	<u>edures</u>	
Procedure of collecting (only wh	en it is directly collected from the d	ata owners):	
Closed-response format	Open-response format		Recording of audio / video
Processing of the data:			
Anonymous	Pseudonimized		Identified

#### Characteristics of the data

Types of processed data:

Identification Social Commercial information data circumstances

Personal Economic or characteristics financial data

Academic and Another **Transactions** professional data sensitive data

#### Conservation and access to data

On which support will data be stored:

Paper Hard drive of a desktop **USB** memory

computer

Special category

of data

Online storage Hard drive of a laptop Another online

offered by UPF computer storage servičes

(This means people that will receive the data, not the Recipients of the personal data:

results or another conclusions of the project)

People that have worked

Everyone in the class (published on the on the project and teachers

Internet)

Everyone

Storage period of the data:

More than one During the term Academic year

academic year

#### Criticality of the data

Consequences for the data owners if there is an unauthorized acces to the data:

Mild consequences Major consequences Enormous

### Result of the risk analysis

#### Provided information results on a risk level of:

out of 5

This self-assessment form is indicative. It is created to help understand the existing risks when creating an academic work.

There is no threshold on which a risk becomes excessive. Sometimes we can't avoid working on projects which need processing of personal data and have risks related to it.

It is mandatory to evaluate the scope of the need of doing this project and this kind of processing, the purpose of the work and the risk to people, and adopt all the necessary measures to remove these risks, o minimalize them if removing them is not possible.

From the given answers to the form, we have identified the following risk factors, on which you can apply the following elimination or mitigation tasks:
