**Enginyeria de Xarxes / Network Engineering** | Escola d'Enginyeria – Universitat Pompeu Fabra

Boris Bellalta (boris.bellalta@upf.edu, Office: 55.222)

## Lectures, Seminars and Labs

Lecture 1 – Introduction
Lecture 2 – Stochastic Processes
Lecture 3 – Markov chains I – Discrete Time Markov chains
Lecture 4 – Markov chains II – Continuous Time Markov chains
Lecture 5 – Introduction to Wi-Fi
Lecture 6 – Modeling a network interface I – Definitions, Erlang notation, MMSK queues
Lecture 7 – Modeling a network interface II – MM1 and MM1K systems
Lecture 8 – Modeling the end-to-end communication, and routing
**Lecture 9 – Mid-term exam**
Lecture 10 – MG1 queues I – General service times, heterogeneous flows
Lecture 11 – MG1 queues II – Multiple flows, traffic differentiation
Lecture 12 – MG1 queues III – Low-latency region

Seminar 1 – Stochastic Processes
Seminar 2 – Markov chains
Seminar 3 – Admission control WIFI
Seminar 4 – MM1 and MM1K queues, end-to-end communication
Seminar 5 – MG1 systems

Lab 1 – Basic Communication System – Introduction to the simulator
Lab 2 – Simulation of queueing systems: M/M/1/K, M/D/1/K, D/M/1/K, etc.
Lab 3 – Wi-Fi DCF in saturation conditions
Lab 4 – Wi-Fi DCF in non-saturation conditions
Lab 5 – Lab Project: Traffic-differentiation in Wi-Fi
Lab 6 – Lab Project: Traffic-differentiation in Wi-Fi

## Evaluation

Mark 1 = 0.6 · Final Exam + 0.2 · Mid-term Exam + 0.2 · Labs
Mark 2 = 0.7 · Final Exam + 0.1 · Mid-term Exam + 0.2 · Labs
→ if Final Exam >= 4 then Course grade = max (Mark 1, Mark 2); else Course grade = Final Exam
*In July, only the final exam can be recovered.*
