FIRST SCREEN:

A few weeks ago you completed a survey on different topics about the political situation in your country. This is a continuation of that study. Your participation this second time is very important and will help us learn the opinions of people living in Argentina regarding the current political situation and the functioning of democracy in the country. The problems and challenges of our political and social systems require a good study of citizens' opinions and therefore your attentive and dedicated participation is essential for this study and to understand the major problems of current democracies. Your answers will remain completely anonymous and will only be subject to statistical analysis together with those of the hundreds of other participants.

This is a survey designed by a group of national and international researchers as part of a project led by a professor at the Pompeu Fabra University, who is interested in studying the opinions of people like you on issues related to political, economic and social events. Thus, you will be part of a group of 1,200 people from all over Argentina participating in this study.

If you have doubts, complaints, or questions about this study or about your rights as a research participant, you may contact UPF's Institutional Committee for the Ethical Review of Projects (CIREP) by phone (+34935422186) or by email (secretaria.cirep@upf.edu). CIREP is not part of the research team and will treat any information you send confidentially.

[GENERAL INSTRUCTIONS: ALL QUESTIONS esmP_X ARE MANDATORY. ALL QUESTIONS p_X FOLLOW THE SAME LOGIC AS WAVE 1. INCLUDE A VARIABLE THAT CALCULATES THE TIME SINCE THE END OF WAVE 1 AND WHEN WAVE 2 IS ANSWERED]

GAME 1

Before answering some questions, we would like to pair you with other respondents of this survey (real individuals) to measure different reactions to certain situations. However, you will never personally interact with these individuals. In addition, you will never know their identity and they will never know yours. The individuals you have been paired with live in Argentina.

[NEXT SCREEN]

We invite you to take some decisions in a situation with “You” and “Individual 2”.

Individual 2, like you, received 5 points to participate in the study. You will not be told who this person is either during or after the survey (nor will that person be told anything about you).

Today, you will have the opportunity to send some, all, or none of your X 5 points to Individual 2. This person will then keep the points sent to them, if any, and you keep the remainder.

The situation is as follows:

- 1.) You must decide how many points (if any) you will send to Individual 2. Any amount you keep for yourself will be given to you.
- 2.) Whatever amount you send to Individual 2 will be tripled before it is passed on to him/her.
- 3.) Individual 2 then has the option of returning any portion of this tripled amount to you.

For example:

- (a) If you send 1 point, Individual 2 will receive 3 points.
- (b) If you send 5 points, Individual 2 will receive 15 points.

[NEXT SCREEN]

To review, any number of points you send will be tripled and given to Individual 2. This person will keep the points you send them, minus the number of points they return to you. Your payoff in this scenario is the number of points that you kept for yourself, plus any points Individual 2 decide to return to you. Keep in mind that the points he/she will have depends on your initial decision.

To clarify how this situation works, consider the following examples:

If you send:	Individual 2 receives:	Individual 2 might return:	You receive: (5 - # sent + # returned)	Individual 2 receives: (5 + # received - # returned)
1 point	3 points	1 point	$5 - 1 + 1 = 5$ points	$5 + 3 - 1 = 7$ points

2 points	6 points	2 points	$5 - 2 + 2 = 5$ points	$5 + 6 - 2 = 9$ points
5 points	15 points	10 points	$5 - 5 + 10 = 10$ points	$5 + 15 - 10 = 10$ points
3 points	9 points	0 points	$5 - 3 + 0 = 2$ points	$5 + 9 - 0 = 14$ points
0 points	0 points	0 points	$5 - 0 + 0 = 5$ points	$5 + 0 - 0 = 5$ points

[NEXT SCREEN]

esmP8_2 Do you understand the situation and the outcome?

- Yes [GO ONTO THE NEXT SCREEN]
- No [RETURN TO THE INSTRUCTIONS]

[NEXT SCREEN]

esmP9_2 Referring to the type of situation we outlined above, suppose you gave 3 points, out of 5, to the other individual, how many points would the other individual receive for your decision?

- 9 (correct=1) [GO ONTO THE NEXT SCREEN]
- 5 (incorrect=0) [RETURN TO THE INSTRUCTIONS]
- 21 (incorrect=0) [RETURN TO THE INSTRUCTIONS]

esmP10_2 Now suppose the other individual returned 1 point to you, how many points would you end up with?

- 10 (incorrect=0) [RETURN TO THE INSTRUCTIONS]
- 15 (incorrect=0) [RETURN TO THE INSTRUCTIONS]
- 3 (correct=1) [GO ONTO THE NEXT SCREEN]

[NEXT SCREEN]

Now, we are going to invite you to interact with other respondents in this same study to give you the opportunity to share and obtain some additional points.

Now we would like to ask you a few more questions.

There are many ways to govern a country. To what extent would you agree or disagree with the following?

[PROGRAMMER: ROTATE THE ORDER OF THE TOPICS AT RANDOM FOR EACH RESPONDENT, SEPARATED INTO SCREENS WITH 3-4 ITEMS ON EACH FOR A TOTAL OF 2 SCREENS]

p7g_2	In times of national crisis, I would approve of a law that prohibited public protests	1	2	3	4	5	888

Now we'll talk about aspects of your POLITICAL preferences. Remember again how important it is that you read the questions carefully and choose the answer that best fits what you think and feel. The results and quality of this international research depend on your effort and attention to answer.

p12_2 When talking about politics, people talk about "left" and "right". Can you please tell us where you would position yourself on a scale of 0 to 10 where 0 means "left" and 10 means "right"?

Ratings between 60 and 100 mean that you have rather favourable feelings toward that group of people, with 100 being very favourable; while ratings between 0 and 40 mean instead that you have rather unfavourable feelings toward the group, with 0 being very unfavourable. If you do not have particularly favourable or unfavourable feelings toward a group, you should choose a 50 grade rating.

Finally, for a subset to play the role of players 2s—this is to remove deception from the game. Only need an anonymous game—no treatments.

[Trust Game, Player 2] ALL RESPONDENTS

Finally, we would now like to ask you to interact one last time with another participant in this study.

In this interaction there are two participants: Participant 1 and Participant 2. *You are Participant 2.*

Participant 1, like you, received 5 points for participating in the study. You will not know who this person is during or after the study, and that person will not be told who you are either.

Participant 1 was given the option to send you some, none, or all of their 5 points. If Participant 1 sends any points to you, those points will be tripled. You will then have the option of returning to Participant 1 some, none, or all of your points.

The interaction unfolds as follows:

- 1) You receive the points that Participant 1 sent you, multiplied by three.
- 2) Then, you must decide how many points you are going to send to Participant 1, if any. You will keep the points that you do not send.

To clarify how the interaction works, consider the following examples:

If Participant 1 sends:	You receive	If you decide to return:	Participant 1 receives: (5 - # sent + # returned)	At the end, you receive: (5 + # received - # returned)
1 point	3 points	1 point	$5 - 1 + 1 = 5$ points	$5 + 3 - 1 = 7$ points
2 points	6 points	2 points	$5 - 2 + 2 = 5$ points	$5 + 6 - 2 = 9$ points
2 points	6 points	4 points	$5 - 2 + 4 = 7$ points	$5 + 6 - 4 = 7$ points
3 points	9 points	3 points	$5 - 3 + 3 = 5$ points	$5 + 9 - 3 = 11$ points
4 points	12 points	5 points	$5 - 4 + 5 = 6$ points	$5 + 12 - 5 = 12$ points
5 points	15 points	7 points	$5 - 5 + 7 = 7$ points	$5 + 15 - 7 = 13$ points
0 points	0 points	0 points	$5 - 0 + 0 = 5$ points	$5 + 0 - 0 = 5$ points

esmp21_2 Do you understand how this interaction works?

- Yes [GO ONTO THE NEXT SCREEN]
- No [RETURN TO THE INSTRUCTIONS]

[NEXT SCREEN]

esmp22_2 Regarding the type of interaction explained above, suppose Participant 1 sends you 2 points (which are tripled). How many points will you have after receiving those points from Participant 1?

- 3 [RETURN TO THE INSTRUCTIONS]
- 6 [RETURN TO THE INSTRUCTIONS]
- 11 [**correct answer**] [GO ONTO THE NEXT SCREEN]

Correct answer [FILTER: GO ONTO THE NEXT SCREEN]

Incorrect answer [FILTER: "The answer is not correct. Please check the instructions again."]

[NEXT SCREEN]

Now that you understand the interaction, we would like you to tell us how many points you would return to Participant 1 depending on how many points Participant 1 sends you. Your answers to this interaction will be checked against the decisions made by a real person who is Participant 1. As Participant 1 you can send any number of points between 0 and 5 to you (and you will receive that amount in triplicate), we want you to tell us how many points you would return in each situation, if at all.

esmP23_2 Please indicate your options in the table below.

If Participant 1 sends:	You receive:	You have in total:	How many points, if any, you want to return to Participant 1?
0 points	0 points	5 points	
1 point	3 points	8 points	
2 points	6 points	11 points	
3 points	9 points	14 points	
4 points	12 points	17 points	
5 points	15 points	20 points
