9. Conclusion.....	28

## 1. Executive Summary

This document provides a summary of all the developments by all partners during the three years of the project, an outline of how these developments are going to be exploited, and what the partners have done to promote their work. This is set against a wider discussion of how HDR can be deployed creatively to best effect, and the wider commercial opportunities arising from it. Rather than repeating all the detail set out in the individual deliverables, especially those of the 3<sup>rd</sup> year, this document tries to highlight the importance of an overall HDR ecosystem in the successful production and distribution of HDR content. For a full discussion of each of the development topics, including all references, we refer to the final deliverables in each of the development work packages.
