Post doctoral researcher for the GReNeC-NeuroBio team

Job description

We require a postdoctoral researcher to join the GReNeC-NeuroBio team at the Department of Experimental and Health Sciences, UPF.

The ideal candidate should have a PhD in the field of Biology, Biochemistry, Psychology, Neuroscience, but other backgrounds could also be considered. Experience in the development of neurobiology projects and in teaching will be highly valued. She/he should be an autonomous researcher, a good team player and able to supervise students.

The main tasks of the successful candidate will be:

- Design, plan and carry out experiments in the frame of a research project using behavioural, immunohistochemistry, neuroanatomical and molecular techniques.
- Give lectures of Degree and Master of the University Pompeu Fabra.
- Actively participate in the research and teaching duties of the team.
- Supervision of PhD, master and graduate students.

Institution that finance the contract

UPF will finance the contract with funds from GReNeC-NeuroBio

Information on the minimum requirements

- In possession of a PhD degree in Neurosciences, Psychology, Biochemistry or Biology
- Experience in experimental models using behavioural animal models to investigate emotional and cognitive tasks
- The candidate must have experience in biochemical and molecular techniques to be applied in samples from CNS tissues.
- It will be appreciated to be in possession of the Accreditation for working with animal models
- Previous teaching activity will be appreciated

Benefits of the opening

This is a full-time position and the candidate will receive one-year contract with possibility of one-year extension.

Starting data: October 1st, 2019.

Information on the application process

Deadline to submit applications: **August 4th, 2019.**

Please, send a motivation letter, a CV and two reference letters with contact details to seleccion.grenec@upf.edu, indicating "Post-doctoral position at GReNeC-NeuroBio".
