Date of publication of the job offer: February 14th 2020

Job Offer: Bioinformatics analyst at the Genomics Lab

Job Description:

We are looking for a bioinformatics analyst to help in developing pipelines and conducting analyses of RNA and DNA sequencing data, integrating multiple sources of functional information and elaborating detailed reports of the results.

Project and Institution that finance the contract

The work is supported by grant: INB – Instituto nacional de Bioinformàtica, Plan Estatal de Fomento de la investigación Científica y Técnica de Excelencia (2013-2016) - ISCIII, from the Spanish Ministry of Economy (MINECO), FEDER and Agencia Estatal de Investigación sources.

Official number reference: PR03917 - ISCIII-PT17/0009/0014 F.Sanz FEDER

Skills and Experience

The candidate should have a degree in the life sciences with demonstrated experience in bioinformatics. More concretely, analysis of DNA and RNA sequences, analysis of RNA expression, integration of molecular databases, processing of high-throughput sequencing data. Excellent written and oral communication skills in English.

Benefits of the opening

We offer a six months, part-time contract (30hrs/week), with a yearly gross salary of 17.500 EUR.
