The Department of Experimental and Health Sciences at Pompeu Fabra University has a **Senior Research Assistant** opening position

### **Job title**

Postdoctoral Fellow / Senior Research Assistant

### **Job description**

We are seeking for motivated scientist to work on engineering genome editing tools applied to developing more efficient and safer gene therapy technology. The candidate will participate in an international and highly translational project with Interactions with industry and clinicians.

### **Requirements**

- PhD in engineering, experimental or health sciences
- Relevant experience in gene or cell therapy, advanced genome editing methods or viral vectors for gene therapy, nanoparticles for in vivo delivery or relevant similar experience.
- Interest in applied genetic engineering and synthetic biology. Curiosity and motivation to develop new biotechnologies to treat diseases
- Good management and communication skills. Excellent team player who enjoys working in a fast evolving research environment.

### **Benefits**

The candidate will receive a full-time contract and competitive salary. She/he will receive in complementary training through UPF courses and the PRBB Intervals Programme.

### **Location**

Our lab belongs to The Department of Experimental and Health Sciences (DCEXS - FCSV; <https://www.upf.edu/cexs/>) and is located at the PRBB in Barcelona (<http://www.prbb.org/>), one of the largest hubs of biomedical research of southern Europe.
