

**Date of publication of the job offer: 23/03/2021**

**Job title: Research assistant**

### **Job description**

Setting up a digital archive documenting aspects of the history of scientific research in the domain of Artificial Intelligence and its societal and cultural impact. This requires selecting and setting up the structure of a digital multi-media archive, collecting materials from the web and other sources, organising this material and presenting it in a way that is accessible digitally to an audience of researchers and to a general audience.

### **Project and Institution that finance the contract**

EC-H2020-ICT-2018-20-HumanE-AI-NET

### **Official number reference**

Id. Official: 952026

### **Information on the minimum requirements**

Familiarity with tools for building and maintaining digital archives.

Familiarity with methods and techniques for historical research. Interest in scientific research in general and research in computer science in particular.

Ability to work autonomously.

Languages: Catalan, English.

Possible educational background: Master's degree in History of Science, Archival and Records Management, Cultural History, Journalism and Digital Content Innovation - or equivalent experience in setting up and maintaining digital archives for scientific or artistic histories.

### **Benefits of the opening**

The successful candidate will be offered a part-time year contract with an annual gross salary around 19-20.000,00€, commensurable with experience, with the possibility of an extension.
