Job title

Laboratory technician

Job description

The successful candidate will join an enthusiastic and collaborative team in an excellent multidisciplinary scientific environment. He/She is expected to provide support to the Endocrine Regulatory Genomics laboratory by performing molecular biology experiments. Together with other members of the team the successful candidate is also expected to develop and apply new techniques to tackle the biological questions addressed in the laboratory and more specifically in a project related to type 1 diabetes.

Information on the minimum requirements

- Experience in cell culture and molecular biology techniques. Experience in preparation of 'omics experiments (Ex. ATAC-seq, UMI4C and ChIP-seq) will be evaluated positively.
- Highly developed organization skills
- Capable of working in a group, and with a high degree of work autonomy
- Good oral communication skills in English
- Hold a B.Sc, M.Sc or PhD in molecular biology or related field.

Benefits of the opening

We offer a competitive salary depending on the experience and provide a highly stimulating environment with state-of-the-art infrastructures in a diverse and inclusive environment and welcomes applicants regardless of age, disability, gender, nationality, ethnicity, religion, sexual orientation or gender identity.

Information on the application process

Please send an e-mail to lorenzo.pasquali@upf.edu before the 31/10/2021 including a CV and a reference contact.
