Topics in Macroeconomics III: International Trade and Economic Growth

2022–2023 Academic Year

Master of Research in Economics, Finance and Management

1. Description of the subject

- Topics in Macroeconomics III Code: 32082
- Total credits: 3 ECTS Workload: 75 hours
- Term: 2nd
- Type of subject: Optative
- Department of Economics and Business
- Teaching Team: Paula Bustos and Marti Mestieri

Paula Bustos (paula.bustos@upf.edu)

Marti Mestieri (marti.mestieri@upf.edu)

Classes: 10:30 to 12:30 Tuesdays and Wednesdays @ 20.173

Office hours by appointment.

2. Teaching guide

Introduction

This course is an advanced PhD class that introduces students to selected topics on International Trade and Economic Growth. The course covers the main theories of structural transformation and the associated empirical evidence. The course is taught by Paula Bustos (PB), and Martí Mestieri (MM).

Weeks of teaching: Jan 10 (MM), Jan 17 (PB), Jan 24 (MM), Jan 31 (PB), Feb 07 (PB & MM).

Contents

1. Structural transformation

1.1 Supply side

1.1.1 Theories with Exogenous Technology (2 lectures MM)

Differences in Productivity

Ngai and Pissarides (2007), "Structural Change in a Multi-Sector Model of Growth", AER.

Differences in Capital Intensity

Acemoglu and Guerrieri (2008), "Capital Deepening and Nonbalanced Economic Growth", JPE.

Alvarez-Cuadrado, Long and Poschke, (2017) "Capital-labor Substitution, Structural Change and Growth", TE.

Investment and Consumption

Herrendorf, Rogerson, Valentinyi, "Structural Change in Investment and Consumption: A Unified Approach", Review of Economic Studies.

Garcia-Santana, Pijoan-Mas, Villacorta, "Investment Demand and Structural Change", Econometrica.

Background readings:

Acemoglu, "Introduction to Modern Economic Growth", Chapter 20

Herrendorf, Rogerson, Valentinyi, "Growth and Structural Transformation", Handbook of economic growth.

Buera, Kaboski "Can Traditional Theories of Structural Change Fit The Data?," JEEA 2009, vol. 7(2-3), pages 469-477, 04-05.

Buera, Kaboski, Mestieri and O'Connor, "The Stable Transformation Path", CEPR WP 2019.

1.1.2 Empirical evidence (2 lectures PB)

Bustos, P., B. Caprettini, and J. Ponticelli (2016). Agricultural Productivity and Structural Transformation: Evidence from Brazil. *American Economic Review*.

Heblich, S., Redding, S. J., & Voth, H. J. (2022). *Slavery and the British Industrial Revolution* (No. w30451). National Bureau of Economic Research.

Fajgelbaum, Pablo, and Stephen J. Redding. "Trade, Structural Transformation, and Development: Evidence from Argentina 1869–1914." *Journal of Political Economy* 130.5 (2022): 1249-1318.

Bustos, P., G. Garber, and J. Ponticelli (2020). Capital accumulation and structural transformation. *The Quarterly Journal of Economics* 135 (2), 1037–1094.

Colmer, J. (2021). Temperature, labor reallocation, and industrial production: Evidence from India. *American Economic Journal: Applied Economics* 13 (4), 101–24.

Background reading

Corden and Neary, (1982) "Booming Sector and De-Industrialisation in a Small Open Economy", *Economic Journal*.

Matsuyama, Kiminori, "Agricultural Productivity, Comparative Advantage, and Economic Growth," *Journal of Economic Theory* 58 (December 1992): 317–334.

Matsuyama, Kiminori, "Structural Change in an Interdependent World: A Global View of Manufacturing Decline", *Journal of the European Economic Association*, 2009.

Gollin, D., Jedwab, R. & Vollrath, D. Urbanization with and without industrialization. *J Econ Growth* **21**, 35–70 (2016).

1.2 Demand Side (2 Lectures MM)

Nonhomothetic Preferences

Comin, Mestieri and Lashkari, (2021) "Structural Transformation with long-run Income and Price effects," *Econometrica*

Boppart, Timo (2014), "Structural Change and the Kaldor Facts in a Growth Model," *Econometrica*.

Alder, Mueller, Boppart "A Theory of Structural Change that Can Fit the Facts", *AEJ: Macro*.

Additional readings

Matsuyama, Kiminori (2000), "A Ricardian Model with a Continuum of Goods under Nonhomothetic Preferences: Demand Complementarities, Income Distribution, and North-South Trade," *JPE*, pp.1093-1120.

Cecilia Fieler, "Non-homotheticity and Bilateral Trade: Evidence and a Quantitative Explanation," *Econometrica*

Caron-Fally-Markusen, "International Trade Puzzles: a solution linking production factors and demand," *QJE* 2014

Khandelwal, A. Pablo Fagjelbaum, "Measuring the Unequal Gains from Trade," *QJE* (2016).

2. Trade and Growth

2.1 Theory: Endogenizing Technology with Directed Technical change (1 lecture MM)

Matsuyama, Kiminori, (2019) "Engel's Law in the Global Economy," *Econometrica*.

Foellmi, R. and Zweimuller, J. (2006)," Income Distribution and Demand-Induced Innovations", *Review of Economic Studies*, 73(4):941-960.

Assessment and grading system

Evaluation

Class evaluation will be based on a written research project (90%) plus class participation (10%).

Research Proposal and Presentation

Research proposals are to be submitted by February 13th. You can develop an original idea or propose an incremental improvement of a topic/paper that we have discussed. You are encouraged to discuss with Paula and Martí before you embark on your proposal. The written research proposals cannot exceed 7 pages. In the proposal, you should state your research idea clearly at the beginning. If the paper is theoretical, you should (at least) sketch your theory and provide some preliminary results. If the paper is empirical, you should (at least) discuss the data sources you will use, which variables would you use and what econometric specifications you would test. If there are some preliminary results, even better.
