

Job position: Researcher in biostatistics and epidemiology methods.

Department: Department of Experimental and Health Sciences.

Division: Center for Research in Occupational Health (CiSAL)

Duration: 4 years (renewable every year with an evaluation process at the end of 2nd year)

City/Country: Barcelona/Spain

Job Posting: 14th July, 2015

Job Closing: 15th August, 2015

Description

The Center for Research in Occupational Health (CiSAL) in Pompeu Fabra University (UPF) invites applications for a research position in biostatistics and epidemiology. The position will start between September 22nd and October 1st, 2015. We seek individuals with specialization in the application and development of biostatistics methods in public and occupational health.

The candidate will be involved as a team member in the following lines of research: 1) occupational health, especially sickness absence, 2) surveys of working conditions and health, 3) occupational safety and health policies, and 4) occupational health inequalities. Candidates must have a doctoral degree (e.g., PhD) in epidemiology, statistics or equivalent degree. The successful applicant will be expected to engage in teaching in both our undergraduate and master's programs in occupational health and public health, and to mentor graduate students. Teaching and research experience, including excellent publication record, will be relevant for the position. Previous experience is especially valued in advanced knowledge of statistical packages (Stata, R, SPSS, and SAS), and multilevel and longitudinal designs and analyses including latent growth trajectory analysis. Fluency in both English and Spanish is required; knowledge of Catalan is preferred.

The Center for Research in Occupational Health (CiSAL) is part of the Department of Experimental and Health Sciences in UPF and located in Barcelona (Spain). CiSAL seeks to become a center of excellence, recognized academically, professionally and socially for the generation and transfer of useful knowledge to improve the health of workers. To accomplish this, CiSAL serves as a unique academic venue where science and society interact, producing and disseminating useful scientific knowledge to inform policy with the ultimate goal of improving the health of all workers. CiSAL is grounded in the values of team work, intellectual rigor and social responsibility. CiSAL is recognized as a research group by Pompeu Fabra University (since 1998) and the Agency for Management of University and Research Grants (AGAUR) (since 2002), as a consolidated group of the CIBER-Epidemiology and Public Health by the Instituto de Salud Carlos III (since 2008), and is affiliated with the Institut Hospital del Mar d'Investigacions Mèdiques IMIM Parc de Salut MAR (since 2014). For more information on CiSAL, please visit our website at: <http://www.upf.edu/cisal/en/>.

Applications should include a cover letter; curriculum vitae and two reference letters. Please send this information by e-mail to Fernando G. Benavides (fernando.benavides@upf.edu).

The closing date for the job is August 15th, 2015
