Master's Thesis Award Master in Migration Studies – Universitat Pompeu Fabra Guidelines

Who is eligible? Master's Thesis Award is presented to a student enrolled in Master in Migration Studies program (as expert or research profiles) during the current academic year. The award is restricted to Master's thesis only.

What are the evaluation criteria?

The Master's Thesis must exemplify original basic research skills, first research competences (General, Specific and Transversal) and learning outcomes in the field of migration studies (see the table of competences and skills below).

Substantial criteria are:

- Awareness of the significance and impact of contributions to the field of migration studies
- Quality of methodology
- Quality of writing

How does the process of selection work?

The nominations will take place after the public defense of master's theses in June. The process will follow two steps:

- First step: we will consider the three best marks of the global evaluation (supervisor mark 70% and oral defense by a specific evaluative committee, 30%). In case there are more than three eligible theses then the specific evaluative committee mark will decide).
- Second step: The Award Committee, whose members will be composed of two professors in Master in Migration Studies program and one external professor in the field will evaluate the three nominations and select one for the Award.

How will the Award be communicated?

- Once the three selected candidates have been identified, the coordinator will communicate it to the candidates.
- The winner will be notified not more than one month after the oral defense.
- The other two candidates will be informed and a certificate of being in the final list will be issued.

What are the benefits of this Award?

- This Award will not have economic compensation. It is considered as a first recognition of research skills and competences with a formal certificate.
- The award will be disseminated through appropriate websites and the possibility to submit and publish the Master thesis in GRITIM-UPF Working Paper Series (https://www.upf.edu/web/gritim/working-series).

28/05/2018

The students should acquire knowledge that will constitute the basis for them to develop and apply original ideas, particularly in relation to the design and implementation of a research project or an expert study. That students are able to integrate knowledge and face the complexity of making judgments from information that, incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments from a clear and on-ambiguous fashion, using references adequately to support their arguments. CG 1		Herdisciplinary Research Group on Immigration 28/U3/2018
Imited, includes reflections on social and ethical responsibilities inked to the application of their knowledge and judgments	CB6	
Capacity to express and use theoretical concepts related to migration and diversity based on an initial diagnosis of the situation and the formulation of hypotheses Capacity to express and use theoretical concepts related to migration and diversity based on an initial diagnosis of the situation and the formulation of hypotheses Capacity to search, manage, analyze, interpret, produce and apply information related to concrete topics concerning immigration, from a thematic and sectorial point of view Capacity to search, manage, analyze, interpret, produce and apply information related to concrete topics concerning immigration, from a thematic and sectorial point of view Capacity to solve problems related to migration studies on a short and long term basis, applying a critical perspective	CB8	
CG 1 Capacity to express and use theoretical concepts related to migration studies. Ability to maintain an argumentation about topics related to migration and diversity based on an initial diagnosis of the situation and the formulation of hypotheses CG 3 Communicate with experts from other areas in order to bring knowledge acquired and promote interdisciplinarity in the study of migrations CG 4 Capacity to search, manage, analyze, interpret, produce and apply information related to concrete topics concerning immigration, from a thematic and sectorial point of view CG 5 Ability to solve problems related to migration studies on a short and long term basis, applying a critical perspective CG 6 Organize, plan and publicly defend a research plan CG 7 Generate new ideas around a research plan CG 7 Capacity to work with topics related to migration guided by ethical values and empathy. ***********************************	CB9	The students should be able to communicate their conclusions and the knowledge they have acquired to both experts and non-experts in a clear and on-ambiguous fashion, using references adequately to support their arguments.
Ability to maintain an argumentation about topics related to migration and diversity based on an initial diagnosis of the situation and the formulation of hypotheses Communicate with experts from other areas in order to bring knowledge acquired and promote interdisciplinarity in the study of migrations Capacity to search, manage, analyze, interpret, produce and apply information related to concrete topics concerning immigration, from a thematic and sectorial point of view Capacity to solve problems related to migration studies on a short and long term basis, applying a critical perspective Capacity to solve with topics related to migration and diversity Capacity to work with topics related to migration and diversity Capacity to work with topics related to migration and diversity Capacity to work with topics related to migration and diversity Capacity to work with topics related to migration and diversity Incorporate ethical and human values on migration and diversity and in writing Incorporate ethical and human values in migration research Capacity to work with topics related to migration research Capacity to work with topics related to migration guided by ethical values and empathy.
