

Bruno Arpino is an associate professor at the Department of Political and Social Sciences, Universitat Pompeu Fabra (UPF) and co-director of the Research and Expertise Centre on Survey Methodology (RECSM, UPF). He obtained a PhD in Applied Statistics from the University of Florence (Italy) in 2008. His main research interests are in the areas of causal inference, applied statistics and social demography. He is particularly interested in propensity score methods, especially for multilevel and network data. From a substantive point of view he has been studying intergenerational relationships, ageing and health, fertility and immigrants' assimilation. He has published articles in international peer-reviewed journals such as *The Annals of Applied Statistics*, *Demography*, *European Sociological Review*, *Journal of Marriage and Family*, *Journal of the Royal Statistical Society - A and C*, *Social Indicators Research*, *Statistics in Medicine*. Since October 2017 he is member of the Editorial Board of *Statistical Methods and Applications*.
