

Xavier Fernández-i-Marín is lecturer at the Geschwister-School-Institute for Political Science at the Ludwig-Maximilians-Universität (LMU) in Munich, working on comparative public policy. He has been previously senior researcher at ESADE working on the entrepreneurial roles of end users to shape a green EU economy, and assistant professor at the University of Konstanz in 2014 working on the diffusion of social and environmental policies. Before he has been research fellow at ESADEgeo (Center for Global Economy and Geopolitics) working on the determinants of the cooperation amongst countries and Global Governance, and "Juan de la Cierva" post-doc research fellow at IBEI (Institut Barcelona d'Estudis Internacionals) from 2009 until 2011. He presented his PhD on Technology and Public Policy: An Evaluation of Internet and e-Government policies in Spain in 2008 at the Political and Social Sciences Department of the Universitat Pompeu Fabra. He has been trained in methodology at the University of Essex, obtaining a postgraduate degree, and teaching in the summer school for several years. He has large experience with hierarchical/multilevel models and Bayesian inference, and also in cluster analysis, principal component analysis, factor analysis, survival (event history) analysis, spatial models and quantitative methods in general. This has allowed me to collaborate with several disciplines, bringing scientific, methodological and systematic value to the different teams.
