

Summer Internship Programme in Epigenetics, Cellular Plasticity and Stem Cells

This international programme is a unique opportunity for students who are interested in pursuing a career in the life sciences to find out more about life in the lab and gain hands-on experience at the bench.

Highly talented and motivated undergraduate students will work alongside leading researchers for 8 weeks on cutting-edge projects and experience a highly stimulating research environment within the Helmholtz Zentrum München, Germany.

Application deadline 17 / 02 / 2017
