32450 - Terminology, neology and society

Teaching Guide Information

Academic Course: 2023/24

Academic Center: 803 - Masters Centre of the Department of Translation and Language Sciences

Study: 8037 - Theoretical and Applied Linguistics - MA

Subject: 32450 - Terminology, neology and society

Credits: 5.0

Course: 1

Teaching languages:

Theory: Group 1: Pending

Teachers: Judit Freixa Aymerich

Teaching Period: Second Quarter

Presentation

This specialty course belongs to the Lexicon track. In this course, the fundamental theoretical concepts of the fields of Terminology and Neology are presented, discussed and applied. They are approached from a perspective that prioritizes their social function.

Associated skills

BASIC COMPETENCES

(CB6) Possess and understand knowledge that provides a for the development and/or application of ideas, often in a research context.

(CB7) Know how to apply the acquired knowledge to solve problems in new or little-known environments within broader (or multidisciplinary) contexts related to their area of study.

(CB8) Integrate knowledge and face the complexity of making judgments based on information that, even though it is incomplete or limited, includes reflections on social responsibilities and labels linked to the application of their knowledge and judgments.

(CB9) Communicate results and conclusions –and the ultimate knowledge and reasons that support them- to specialized and non-specialized audiences in a clear and unambiguous way.

(CB10) Learn in a largely self-directed and autonomous way

(CG1) Creativity for postgraduate research and professional practice

(CG2) Advanced ability to apply scientific skepticism and critical analysis (own and others' work)

(CG3) Ability to apply creativity to research

(CG4) Ability to adapt to new situations

SPECIFIC COMPETENCES

(CE2) Understand scientific texts about language.

(CE3) Identify, describe and classify linguistic phenomena for specific purposes for various applications.

(CE4) Formulate analyzes to solve problems of linguistic theory or applied linguistics, using for this purpose, if appropriate, the

appropriate formalization.

(CE7) Critically evaluate advanced analysis and theoretical concepts in the field of linguistics

Learning outcomes

Learning outcomes

1. Identify, describe and analyze the lexical components in natural language.
2. Understand the core concepts of terminology and neology
3. Ability to define and successfully address research questions in the area.
4. Ability to present research work in a written and oral format.

Contents

The aim of this course is to introduce students to the social aspects related to new words, the object of study of neology, and specialized vocabulary, the focus of terminology. It includes broad topics, with the presentation of the main research lines that are currently being explored in neology and terminology, and theoretical aspects, such as the study of the concepts *term* and *neologism* (which are both characterized by their undefined nature), and other fundamental aspects. The course will also take on more applied approaches, by analyzing cases of linguistic normalization and by solving terminological and neological cases in a multilingual framework, as well as explore the technological dimension, through the design of applications that are suited to actual terminological and neological needs.

Sustainable Development Goals

ODS 4: Quality Education. Ensure inclusive, equitable and quality education and promoting lifelong learning opportunities for everyone

ODS 5: Gender Equality. Achieve gender equality and empower all women and girls

SDG 17A. Cultural and linguistic diversity for Sustainable Development
