- **Jingyi Han** (Translation and Language Science PhD Graduate, 2017). Machine Translation Engineer in United Language Group

Objectives

- Make the PHD students aware about some professional or academic prospects once they finish their studies.
- Hear the tips of the PHD graduates to help them success on their careers.
- Find on them a referee or a future contact that would be useful in their future job search.

Contents

Although getting an academic job is a natural step for many PhD graduates, a greater number of opportunities exist outside of the teaching and education sector. In this session you will hear the storytelling of some PhD graduates both about their professional and academic field experiences.

Methodology

Similar to a "professional panel", with a "Escola de Doctorat" moderator.
