## Offer Description

Collaborate on research tasks in a research project related to empirical analysis. Specifically, the tasks would involve:

1. Collecting and analyzing academic and information resources within the area of Industrial Economics.
2. Advanced economic analysis involving the interpretation and quantification of models.
3. Quantitative modeling and knowledge of advanced models.
4. Attention to detail and documentation of research tasks are crucial parts of the job.

## Where to apply

E-mail [judit.leonart@upf.edu](mailto:judit.leonart@upf.edu)

## Requirements

Research Field Economics » Other  
Education Level Bachelor Degree or equivalent

### Skills/Qualifications

Graduate/Bachelor's degree in Economics, Statistics, Applied Mathematics or a related field. A Master's degree in Economics or a related field is a significant advantage. It is necessary to have an interest in both empirical and theoretical work and advanced knowledge. The position is for graduates with experience in Quantitative Analysis, Industrial Economics and Sustainable Economics

### Specific Requirements

Previous experience in research projects will be valued, especially if they are related to labor and urban economics issues. Experience in programming, especially in STATA or similar data analysis languages, will be highly valued.

## Additional Information

### Benefits

**Gross annual salary:** 32.750,82€ (approximately full time)(equivalent annual salary for a full-time 35-hour day)

### Eligibility criteria

The selection will be made by assessing the CV and, where appropriate, by carrying out a test and/or interview.

The assessment criteria will be the following:

- Suitability of the candidate for the main role or tasks to be carried out.
- Curricular experience, in particular, exposure to research.
- Professional knowledge and skills: Knowledge of experience with statistical software in the academic field. Skills to conduct academic research and use both empirical and economic models methodologies.
- Other merits: communication skills, proficiency in English and Spanish, motivation for the project and for the job.

The candidate who has obtained the highest score in the selection process will be the one awarded the job.

Criteria scoring:

1. Academic training: 0-20 points.
2. Professional experience/suitability for the proposed profile: 0-60 points.
3. Other merits: 0-20 points.

The minimum score to pass the selection process is: 60 points

### Selection process

**To apply for these positions, interested candidates should send the following documentation to the following e-mail [judit.leonart@upf.edu](mailto:judit.leonart@upf.edu):**

1. Curriculum vitae
2. Brief cover letter describing research interests
3. NIF/NIE/Passport

4. Academic transcript of undergraduate studies (and postgraduate, if completed)
5. Recent research work carried out by the candidate
