
Call for Position:

ECON-PSR-INDF-2026-22

Financing fund:

Research Project ICREA ACADÈMIA 2021 - Libertad González funded by The European Commission, Europe Horizon and by INSTITUCIÓ CATALANA RECERCA I EST.AV. (ICREA), IP: Libertad González.

Offer:

Research assistant in the field of Labor Economics. Department of Economics and Business. Pompeu Fabra University. Barcelona.

Research Line: The effects of family policies on family well-being

Type of contract:

Indefinite as provided for by Royal Decree 32/2021 of 28 December 2021

Tasks to be performed

Contribute to the research projects of Libertad González along the following lines:

1. Data cleaning and construction. The project involves the treatment of bank transaction data, and it will require the researcher to work at the bank, in collaboration with their research department.
 2. Data analysis. Producing descriptive statistics, running econometric analyses to test the main hypotheses. The project studies the effect of cash transfers to families on spending patterns, labor supply and savings.
 3. Create figures and tables to represent the main results, and prepare presentations in collaboration with the senior researchers in the project.
 4. Contribute to the writing of scientific articles about the results of the project, and assist with the dissemination of the results at conferences and workshops.
-

Requirements:

1. University degree (BSc. or MSc.) in economics.
 2. Strong skills in the areas of applied econometrics and data analysis (including coding skills).
 3. Excellent written and verbal communication skills in English.
 4. Ability to work independently while maintaining close coordination with senior researchers.
-

Salary:

Gross annual salary (part-time): 19.470,26 €

Group and level:

Group: 2

Level: U

Dedication and working hours: 20 hours of dedication per week.

Selection criteria:

Selection will be based on a review of the CV and, where applicable, the completion of a test and/or an interview.

The assessment criteria will be as follows:

- The candidate's suitability for the main role or tasks to be performed.
- Relevant experience.
- Proficiency in coding with Stata/R/Python.
- Excellent teamwork and communication skills
- Fluent in English

The candidate who has obtained the highest score in the selection process will be appointed to the post.

Scores:

1. Academic qualifications: 0–30 points.
2. Professional experience/Alignment with the proposed profile: 0–40 points.
3. Other merits: 0–30 points.

The minimum score to pass the selection process is: 70 points.
