This conference will address the relationship between population ageing and distributive justice. Population ageing raises a number of difficult challenges for distributive justice. The challenges that will be addressed during this conference include how the task of caring for elderly persons should be divided between the state and the family, how pension provision is to be justly arranged and how transfer programmes between the young and old should be adjusted in order to be sustainable and fair to different generations.

**Room 24.518 Sala Polivalent (Mercè Rodoreda Building).**

**Tuesday 11 July**
