TEACHING PLAN FOR
Management of International Operations

1. Basic description

Name of the course: Management of International Operations
Academic year: 2010-2011
Year: 2nd
Term: 3rd
Degree / Course: Bachelor's Degree in International Business and Marketing
Code: 42303
Number of credits: 4
Total number of hours committed: 100
Teaching language: English
Lecturer: Àlex Grasas
Seminar Instructors: Cecilia Mayans (Group 1) and Àlex Grasas (Group 2)

Timetable:

Office Hours & Contact information:
- Àlex Grasas: alex.grasas@prof.esci.es
  Monday from 17.15h to 18.15h
- Cecilia Mayans: cecilia.mayans@prof.esci.es
2. Presentation of the course

Operations Management (OM) is one of the key functional areas in any organization or company that deals with the production of goods and services. It is concerned with managing the processes that transform inputs (materials, labor, energy, customers) into outputs (goods and services). Everything we wear, eat, use, read or play with, has been produced, and an operations manager organized its production. This course is concerned with the tasks, issues and decisions of those operations managers who have made the services and products on which we all depend.

The OM field faces many challenges that are consequence of globalization, new product proliferation, technology advances, and integration with other functional areas of the company (marketing, finances, etc.). For this reason, we analyze Operations in an international context where efficiency is the main goal.

In this course we are going to study the main concepts, tools and quantitative models that companies use to manage their Operations. We are going to do so from a very practical standpoint, studying business cases and solving exercises.

3. Competences to be achieved in the course

<table>
<thead>
<tr>
<th>General competences</th>
<th>Specific competences</th>
</tr>
</thead>
<tbody>
<tr>
<td>Instrumental competences</td>
<td>Professional competences</td>
</tr>
<tr>
<td>G.I.1. Ability to search, analyze, assess and summarize information.</td>
<td>E.P.5. Ability to take strategic managerial decisions whilst taking into account the economic, cultural, social and political determinants specific to a particular area.</td>
</tr>
<tr>
<td>G.I.3. Ability to organize and plan.</td>
<td>E.P.7. Illustrate businesses’ activities in a practical way by visiting companies, having professionals invited to class sessions or by developing and analyzing case studies.</td>
</tr>
<tr>
<td>G.I.5. Ability to take decisions in complex and changing environments.</td>
<td>E.P.8. Ability to take functional decisions within an organization with international activity.</td>
</tr>
<tr>
<td>General personal competences</td>
<td></td>
</tr>
<tr>
<td>G.P.6. Capacity to foresee events.</td>
<td></td>
</tr>
<tr>
<td>Generic systemic competences</td>
<td></td>
</tr>
</tbody>
</table>
The above competences interrelate with the basic competences set out in Royal Decree 1393/2007, namely:

a. competence to comprehend knowledge, on the basis of general secondary education
b. competence to apply knowledge to day-to-day work in international management or marketing, in particular, ability to develop and defend arguments and to solve problems
c. competence to gather and interpret relevant data, enabling the development of critical judgments on the economic and social reality
d. competence to communicate and transmit information (ideas, problems, solutions) to a specialized and non-specialized public
e. competence to develop learning activities in a relatively autonomous manner.

In order to establish a correspondence between the basic competences and those developed in the degree, these are grouped according to two criteria. Thus, the competences developed in the subject are structured into those that are seen as a development or specification of basic competences and those that define the professional profile of the graduate, with respect to general and specific competences.

Basic competence: understanding of knowledge
General competences G.I.3, G.S.2, G.A.2
Basic competence: **application of knowledge**
*General competences* G.S.3  
*Specific competences* E.P.12, E.P.23

Basic competence: **gather and interpret data**
*General competences* G.I.1, G.P.6  
*Specific competences* E.P.24

Basic competence: **develop learning activities**
*General competences* G.I.3, G.S.5  
*Specific competences* E.P.12

Competences that define the professional profile which are not included under basic competences

In general, these competences combine the following key elements for professionalizing students in the area of international business and marketing:
- provide students with the capacity to adapt to dynamic teams and environments
- provide students with the capacity to create their own integral vision of the operation of a business or international marketing project
- provide students with the capacity to take complex decisions and carry out negotiation processes

*General competences* G.I.5, G.A.1, G.A.5  
*Specific competences* E.P.5, E.P.7, E.P.8

Own competences of the subject
Analyze the impact of logistics’ activities in establishing international business strategy.
4. Contents

Chapter 1: Introduction to Operations and Supply Chain Management

Chapter 2: Linear Programming applied to OM problems
Introduction to Linear Programming (LP). Graphical LP. LP using Excel Solver. LP Applications. Integer LP.

Chapter 3: Operations Strategy

Chapter 4: Process Analysis

Chapter 5: Aggregate Planning

Chapter 6: Queuing Management

Chapter 7: Inventory Management

Chapter 8: Lean Manufacturing and Quality
5. Assessment

Ordinary Evaluation
This course is graded from 0 to 100 points, and its regular evaluation will be determined on the following basis:

<table>
<thead>
<tr>
<th>Assessment elements</th>
<th>Time period</th>
<th>Type of assessment</th>
<th>Assessment agent</th>
<th>Type of activity</th>
<th>Grouping</th>
<th>Weight (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class participation</td>
<td>Throughout the course</td>
<td>X</td>
<td>X</td>
<td></td>
<td></td>
<td>9%</td>
</tr>
<tr>
<td>Concept Review Quizzes</td>
<td>Periodically – After each chapter</td>
<td>X</td>
<td>X</td>
<td>Application, Conceptual and Synthesis</td>
<td>X</td>
<td>8%</td>
</tr>
<tr>
<td>Exercise Sets</td>
<td>Periodically</td>
<td>X</td>
<td>X</td>
<td>Application</td>
<td>X</td>
<td>15%</td>
</tr>
<tr>
<td>Case Analyses</td>
<td>Periodically</td>
<td>X</td>
<td>X</td>
<td>Application and Synthesis</td>
<td>X</td>
<td>18%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>Exams Week</td>
<td>X</td>
<td>X</td>
<td>Synthesis</td>
<td>X</td>
<td>50%</td>
</tr>
</tbody>
</table>

Extraordinary Evaluation (September)
At the extraordinary exam sitting, the final grade for the course will be determined on the following basis:

Exercise Sets 15%
Case Analyses 15%
September Exam 70%

Further specifications on grading and assignment rules:
- Both for the Ordinary and Extraordinary Evaluations, passing the course requires a minimum grade of 40 points in the Exam AND an average grade of at least 50 points in total.
- An active involvement in the Glossary of Terms elaboration provides extra credit
- All evaluation items are mandatory. Failing to submit (or submitting late) an assignment results in a 0 in that item.
- Failing to take the final exam implies the qualification of “Not Attended”.
- If two (or more) students (or groups) turn in the same or very similar assignments, they will be given zero points.

6. Bibliography and teaching resources

Basic bibliography (required):

Correspondence between Course Chapters and Book Chapters:

- Chapter 1: book chapters 1 and 2.
- Chapter 2: book chapter 2A.
- Chapter 3: book chapters 1, 2, 4 and 7.
- Chapter 4: book chapters 6 and 20.
- Chapter 5: book chapters 14, 15 and 16.
- Chapter 6: book chapters 8A and 19A.
- Chapter 7: book chapter 17.
- Chapter 8: book chapters 9 and 12.

Supplementary bibliography:

Teaching resources (posted on Aul@-Esci)

• PowerPoint slides for each session.
• Exercise sets.
• Business cases.
• Glossary of Terms.
• Concept Review quizzes.

7. Methodology

Lectures (face-to-face in the classroom): 20 lectures where concepts, theoretical background and basic examples will be taught.

Seminars (face-to-face in the classroom): 9 seminars where business cases and practical exercises will be discussed among students, guided by the instructor.

Exercise Sets (directed outside the classroom): 5 sets of exercises to be independently solved in order to learn and understand the practical concepts taught in class.

Business Cases (directed outside the classroom): 6 business cases to be discussed and resolved by teams in order to apply the course concepts to a realistic business problem.

Concept Review quizzes (independent work outside the classroom): 8 multiple-choice tests to be answered online in order to evaluate the learning of the course main concepts.

Final Exam (independent work).
The following table shows the approximate amount of time required each week to successfully follow the course:

<table>
<thead>
<tr>
<th></th>

8. Scheduling activities

1) Allocation of hours between theory and practical lessons (based on the number of credits in the curriculum):

   2 h of lecture and 1 h of seminar (beginning in the second week of class)

2) Scheduling of activities according to the curriculum.
<table>
<thead>
<tr>
