

# (IN)CORPORATE SUSTAINABILITY CONFERENCE

Pompeu Fabra  
University

From 16 to 18  
September 2020

**CALL FOR PAPERS**  
(In) Corporate Sustainability Conference

Deadline for submissions: August 5, 2020  
[www.upf.edu/web/sustainable-company](http://www.upf.edu/web/sustainable-company)

Following the public calls for action and the limited progress made at COP25 in Madrid on climate action, the scientific community, businesses and public authorities are all answering the call for action not only on the issue of climate emergency, but also on other issues connected with sustainability: from tackling pollution, resource scarcity and advancing the social aspects of sustainability. Awareness of the need for action and the limited time frame for enacting the proposed changes accelerated the developments in the field of sustainability from the diverse market actors: businesses, public administrations and academia. This conference on sustainability aims to focus on the synergies that are to be created from combining the insights on sustainability challenges and solutions from different disciplines, answering the need for an interdisciplinary and multidisciplinary approach for creating a systemic change towards sustainability. The current sustainability challenge demands cooperation, cross-sectoral knowledge and the cooperation of the private and public actors, and (In)Corporate Sustainability Conference seeks to provide a continuous yearly forum in Barcelona for that knowledge to be exchanged, thereby facilitating advancements in the joint goal of sustainability.

We are cordially inviting you to submit your abstracts or papers for presentation at the first annual (In)Corporate Sustainability Conference. The conference will take place on September 16th, 17th, and 18th 2020 at the Faculty of Law, Pompeu Fabra University, Barcelona, Spain (Campus Ciutadella) and virtually. The conference aims to bring together many distinguished researchers in sustainability science from all over the world. Participants will find opportunities for presenting new research, exchanging information, and discussing the current issues. Furthermore, to support the inter and multidisciplinary approach of sustainability science, we welcome any and all suggestions for workshops, best practice presentations for private entities and public authorities in the three respective fields as well as poster presentations of successful projects on sustainability in those fields.
